

STARX APPLICATION:

StarX enables one to burn the CD/DVD from the selected ISO image, grab the CD/DVD image into the ISO format and erase the CD/DVD RW discs. Being small CD/DVD operating utility the StarX is a web ready application which works in the Internet Explorer 6 or above browser. The StarX comes with the neat and advanced interface that fully mimics the standalone Windows XP application.

StarX demonstrates the advanced interface one can create using the CodeThat.Com JavaScript solutions and also demonstrates how it is easy to work with the OCX version from the StarBurn SDK (by Rocket Division Software). StarX however is functional application and enables user to create the CD/DVD image or contrary write the CD/DVD using existing ISO image.

USED COMPONENTS:

The GUI of the StarX was built using the CodeThat.Com JavaScript controls. The following scripts were used:

CodeThatMenu	The menu of the program window.
CodeThatXPBar	The side bar with the commands.
CodeThatTree	The content of the CD/DVD.
CodeThatTab	The tab control within the details dialog

CodeThatForm	The form control used in dialogs.
--------------	-----------------------------------

To find out more about these and other great scripts from the CodeThat.Com please visit company's site at the <http://www.codethat.com/>

WARNING: THE PROFESSIONAL VERSIONS OF THE CODETHAT.COM SCRIPTS SHIPPED WITH THE STARX CANNOT BE USED IN ANY DEVELOPMENT OR FOR ANY PURPOSES AND ARE PART OF THE STARX APPLICATION DISTRIBUTIVE.

The CD/DVD operations are completed using the StarBurn OCX which is part of the StarBurn SDK by the Rocket Division Software. To find out more about the StarBurn SDK please visit company's site at the <http://www.rocketdivision.com/>

WARNING: THE STARBURN SDK LIARIES SHIPPED WITH THE STARX CANNOT BE DISTRIBUTED TO THE THIRDPARTIES AND USER FOR ANY PURPOSES. THESE BINASRIES ARE PART OF THE STARX DISTRIBUTIVE.

REQUIREMENTS:

StarX requires Microsoft Internet Explorer 6 or above in order to run and operate. In spite of the fact that the GUI was built with the cross platform JavaScript applets the Internet Explorer is the only browser that correctly supports OCX (ActiveX) embedded operations and because of the popularity of this browser we decided to limit the support with this only browser.

StarX also requires the active scripting and ActiveX operations enabled (the Windows XP SP2 users may need adjust their security settings accordingly).

INSTALLATION:

The first step is unzip the archive into any folder you like. Please make sure the original folders structure kept unchanged.

You need to register the StarBurn OCX on your system in order to run the application. It is required to run the "installation.bat" file found in the bin folder once. You now ready to work with the program.

APPLICATION FLOW:

To start working with the StarX one only needs to open the index.html in the browser. Once asked whether the ActiveX interaction should be permitted one needs to accept this by hitting "yes". After that the program will be initialized and loaded into the browser.

Most operations are represented by the respective wizards with the minimum settings and grouped by the categories:

Hot Tasks:

Refresh	The list of devices is being refreshed. Useful when you have added new physical or virtual device. Equals closing and reopening of the program.
Load	The disc will be loaded into the device.
Eject	The disc will be ejected from the device.

Wizards:

Grab to Image	You select the device, the speed and name of the resulting ISO file. Then you start the grabbing. The additional option is whether the disc should be ejected upon the completion of the operation.
Write Image	You select the device, the speed and name of the resulting ISO file. Then you start the grabbing. The additional option is whether the disc should be ejected upon the completion of the operation.
Erase Disc	You select the device, the erasing speed and whether Fast erase method should be used and the disc ejected upon the operation completion

Details:

Additional information about the selected device will be displayed.

During the time-consuming operations such as CD/DVD grabbing and burning the main application IE window will be locked however you will see small progress window which will enable you to monitor the operation processing.

LICENSE:

DISCLAIMER OF LIABILITY. THE COMPANY OR ITS SUPPLIERS SHALL NOT BE LIABLE FOR (a) DIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES OF ANY SORT WHATSOEVER, WHETHER ARISING IN TORT, CONTRACT OR OTHERWISE, (INCLUDING WITHOUT LIMITATION DAMAGES FOR LOSS OF BUSINESS PROFITS, REVENUES, OR INFORMATION, OR FOR BUSINESS INTERRUPTION) RESULTING FROM CUSTOMER'S USE OF THE SOFTWARE OR INABILITY TO USE THE SOFTWARE, EVEN IF THE COMPANY HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES, OR (b) FOR ANY CLAIM BY ANY OTHER PARTY THAN CUSTOMER. THIS DISCLAIMER OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY WHERE THE APPLICABLE LAW PROHIBITS SUCH LIMITATION. FURTHERMORE, SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION AND EXCLUSION MAY NOT APPLY TO CUSTOMER.

HIGH RISK ACTIVITIES. The Software is not fault-tolerant and is not designed, manufactured or intended for use or resale as online control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communication systems, air traffic control, direct life support machines, or weapons systems, in which the failure of the Software could lead directly to death, personal injury, or severe physical or environmental damage ("High Risk Activities"). The Company and its suppliers specifically disclaim any express or implied warranty of fitness for High Risk Activities.

THE SOFTWARE CAN BE REDISTRIBUTED IN A WHOLE NOT IN PARTS. THE CONTENT OF THE DISTRIBUTIVE SHOULD REMAIN UNCHANGED.

THE PROFESSIONAL VERSIONS OF THE CODETHAT.COM SCRIPTS SHIPPED WITH THE STARX CANNOT BE USED IN ANY DEVELOPMENT OR FOR ANY PURPOSES AND ARE PART OF THE STARX APPLICATION DISTRIBUTIVE.

THE STARBURN SDK LIARIES SHIPPED WITH THE STARX CANNOT BE DISTRIBUTED TO THE THIRDPARTIES AND USER FOR ANY PURPOSES. THESE BINASRIES ARE PART OF THE STARX DISTRIBUTIVE.
